

Learn Python: Python Keywords

Abrar Hussain

March 2 2015

Keywords are reserved names in Python that we cannot use as identifiers. Below is a listing of them.

Keywords

```
and del from not while as elif global or with assert
else if pass yield break except import print class
exec in raisecontinue finally is return def for lambda try
```

Alternative

```
>>> import keyword
>>> keyword.kwlist
['and', 'as', 'assert', 'break', 'class', 'continue', 'def', 'del', 'elif', 'else', 'except',
'exec', 'finally', 'for', 'from', 'global', 'if', 'import', 'in', 'is', 'lambda', 'not', 'or',
'pass', 'print', 'raise', 'return', 'try', 'while', 'with', 'yield']
```
